

# Access Capital Community Investment Fund - A Shares

## Disciplined Fixed Income Investing with a Community Development Purpose

- Through impact investing, investors can pursue competitive investment returns while achieving measurable social benefits.
- Our approach is to add an impact dimension to generic US fixed income securities that investors typically own.
- These customized securities may achieve lower expected volatility, more stable cash flow characteristics and the return required for a compelling double bottom line outcome.
- Impact investment that helps build stronger communities through its support of low-and moderate-income home buyers, affordable rental housing units, small business administration loans and economic development projects.
- Can meet Community Reinvestment Act requirements.

Performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. For performance data current to the most recent month-end, visit our website at <https://us.rbcgam.com/mutual-funds> after the seventh business day after month-end or call 800.973.0073.

Performance shown reflects contractual fee waivers. Without such waivers, total returns would be reduced. Performance shown for a share class before its inception is based on the performance of the share class with the earliest inception date and adjusted to reflect the fees and expenses, and any applicable sales charges of the share class shown.

<sup>1</sup>The Bloomberg Barclays US Securitized Bond Index represents the securitized portion (mortgage-backed, asset-backed and commercial mortgage-backed securities) of the Bloomberg Barclays US Aggregate Bond Index.

<sup>2</sup>The Bloomberg Barclays US Aggregate Bond Index measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market. It includes Treasuries, government-related and corporate securities, mortgage-backed securities (agency fixed-rate and hybrid adjustable-rate mortgage pass-throughs), asset-backed securities, and commercial mortgage-backed securities (agency and non-agency). You cannot invest directly into an index.

Fund holdings and/or sector allocations are subject to change at any time and are not recommendations to buy or sell any security. Current and future holdings are subject to risk. The credit distribution is subject to change and based on the average of the credit ratings assigned to each security in the portfolio by Moody's, Standard & Poor's, and Fitch. If no rating is provided by any of the agencies, an average of the ratings provided by the remaining agencies is used. The credit quality of the investments in the portfolio does not apply to the stability or safety of the Fund or its shares.

**Average Maturity** - the market-weighted average of the maturities, or due dates, of all bonds held in the portfolio. For securitized bonds, weighted average life, or the average length of time that each dollar of unpaid principal remains outstanding, is used.

**Convexity** - a measurement of the curvature in the relationship between bond prices and bond yields that demonstrates how the duration of a bond changes as the interest rate changes.

**Effective Duration** - a weighted average duration calculation for bonds with embedded options. It takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of a bond's price to changes in interest rates.

**SEC 30-Day Yield** - the net investment income earned by the Fund over the preceding 30-day period and is expressed as an annual percentage rate based on the Fund's share price at the end of the 30-day period. It should be regarded as an estimate of the Fund's rate of investment income, and may not equal the Fund's actual income distribution rate.

The Fund commenced operations on 7.28.08. Performance before that date reflects a predecessor fund. The predecessor fund operated as a continuously offered closed-end interval management company from 5.31.06 through 7.27.08. If the predecessor fund had operated as an open-end management company, performance may have been adversely affected.

*Mutual fund investing involves risk. Principal loss is possible. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. The Fund is non-diversified, which means it may concentrate its assets in fewer individual holdings than a diversified*

*fund. Therefore, the Fund is more exposed to individual security volatility than a diversified fund. Investing in the Fund involves other risks including but not limited to concentration in the affordable housing industry, competition for investments, the effects of leveraging the Fund's portfolio, and investments in illiquid securities. These risks are described more fully in the prospectus.*

**Before investing, you should consider carefully a fund's investment objectives, risks, charges, and expenses.
