Performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. For performance data current to the most recent month-end, visit our website at <https://us.rbcgam.com/mutual-funds> after the seventh business day after month-end or call 800.973.0073. Class A Performance With Maximum Sales Charge reflects a maximum 5.75% sales charge.

Performance shown reflects contractual fee waivers. Without such waivers, total returns would be reduced. Performance does not reflect the 2% fee on shares redeemed or exchanged within 30 days of purchase. If such redemption fee was included, performance would be reduced. Performance shown for a share class before its inception is based on the performance of the share class with the earliest inception date and adjusted to reflect the fees and expenses, and any applicable sales charges of the share class shown.

EBITDA Margin - a measurement of a company's operating profitability as a percentage of its total revenue.

EPS Volatility - a volatility measure defined as a standard deviation of historical earnings per share.

Net Debt/EBITDA - a measurement of a company's leverage and is calculated by dividing the company's interest-bearing liabilities minus cash or cash equivalents by its EBITDA (earnings before interest, taxes, depreciation, and amortization).

Return on Assets (ROA) - an indicator of how profitable a company is relative to its total assets.

Return on Equity (ROE) - a measurement of a company's profitability and reveals how much profit a company generates with the money shareholders have invested.

Weighted Average Market Cap - an average market capitalization of a portfolio calculated by giving more value to stocks with greater portfolio weights than stocks with lesser portfolio weights.

The MSCI Emerging Markets Net Total Return USD Index is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. It captures large and mid capitalization representation across emerging markets countries and covers approximately 85% of the free float-adjusted market capitalization in each country. You cannot invest directly in an index.

Fund holdings and/or sector allocations are subject to change at any time and are not recommendations to buy or sell any security. Current and future holdings are subject to risk.

Mutual fund investing involves risk. Principal loss is possible. The Fund invests

in foreign securities, which involve greater volatility and political, economic, and currency risks, and differences in accounting methods. These risks may be greater in emerging markets. There is a possibility that issuers of securities in which the Fund may invest may default on the payment of interest or principal on the securities when due, which could cause the Fund to lose money. These risks are described more fully in the prospectus.

Before investing, you should consider carefully a fund's investment objectives, risks, charges, and expenses. This and other information is in the prospectus, which you can request by visiting <https://us.rbcgam.com/mutual-funds/literature/content/default.js> or calling 800.422.2766. Please read the prospectus carefully before investing.
