Credit Ratings - ratings represent the opinions of the rating agencies as to the quality of the securities they rate. Ratings are relative and subjective, and are not absolute standards of quality. A portfolio's credit quality does not remove market risk. The Fund is rated AAAM by Standard & Poor's as of 4.30.18. This reflects Standard & Poor's view of the Fund's credit quality, investment policies, market price exposure, and management. It signifies extremely strong capacity to maintain principal stability and limit exposure to principal losses due to credit, market, and/or liquidity risks. The Fund is rated Aaa-mf by Moody's as of 4.30.18. This reflects the high credit quality of the Fund's investments and the diversification of the portfolio, as well as the Fund manager's disciplined investment strategy, well established team approach, and strong risk management capabilities. For more information about the methodology for credit ratings, please visit www.standardandpoors.com and www.moody's.com.

Total Return - the full return on an investment, including dividends, capital gain distributions, and changes in net asset value, and is expressed as a percentage of the initial investment.

Yield - the 7-day average yield is an annualized net yield in which it is assumed that the income earned on the principal is not reinvested in the fund. The 7-day effective yield is an annualized net yield that describes the amount one is expected to earn over a one-year period assuming that dividends are reinvested at the average rate of the last seven days.

Weighted Average Maturity - the market-weighted average of the maturities, or due dates, of all bonds held in a portfolio.
