Current performance of the Fund may be lower or higher than the performance quoted. For performance data current to the most recent month-end, visit our website at <https://us.rbcgam.com/mutual-funds> after the seventh business day after month-end or call 800.973.0073. A portfolio's credit quality does not remove market risk. The Fund is rated AAAM by Standard & Poor's as of 10.31.18. This reflects Standard & Poor's view of the Fund's credit quality, investment policies, market price exposure, and management. It signifies extremely strong capacity to maintain principal stability and limit exposure to principal losses due to credit, market, and/or liquidity risks. The Fund is rated Aaa-mf by Moody's as of 10.31.18. This reflects the high credit quality of the Fund's investments and the diversification of the portfolio, as well as the Fund manager's disciplined investment strategy, well established team approach, and strong risk management capabilities. For more information about the methodology for credit ratings, please visit www.standardandpoors.com and www.moody.com.

Total Return - the full return on an investment, including dividends, capital gain distributions, and changes in net asset value, and is expressed as a percentage of the initial investment.

Yield - the 7-day average yield is an annualized net yield in which it is assumed that the income earned on the principal is not reinvested in the fund. The 7-day effective yield is an annualized net yield that describes the amount one is expected to earn over a one-year period assuming that dividends are reinvested at the average rate of the last seven days.

Weighted Average Maturity - the market-weighted average of the maturities, or due dates, of all bonds held in a portfolio.

The FTSE US Three-Month Treasury Bill Index measures return equivalents of yield averages. The instruments are not marked to market. The index is an average of the last three three-month Treasury bill month-end rates. You cannot invest directly in an index.
