

RBC Small Cap Core Fund

Fund Strategy

Seeks to provide superior long-term growth of capital compared to the Russell 2000 Index while taking a low risk approach to small company investing. We believe that portfolios of neglected small cap companies with low valuations, long-term attractive business fundamentals and near-term profitability improvement potential should produce strong absolute and risk-adjusted returns over time.

Portfolio Construction

Portfolio Construction is Primarily Driven by Stock Selection

- Well-diversified portfolios holding 50-80 issues
- Majority of returns sought from stock selection
- Maximum in a single security: 5%
- Fully invested in equities - no market timing
- Benchmark: Russell 2000 Index
- Low portfolio turnover

Investment Performance (as of 3.31.19)

Without Sales Charge

	Total Returns		Average Annual Total Returns			
	Quarter	YTD	1 Year	3 Years	5 Years	10 Years
A Shares	13.16%	13.16%	-13.28%	5.42%	2.25%	14.23%
I Shares	13.23%	13.23%	-13.06%	5.68%	2.51%	14.51%
R6 Shares	13.26%	13.26%	-13.17%	5.66%	2.52%	14.63%
Russell 2000 Index	14.58%	14.58%	2.05%	12.92%	7.05%	15.36%

With Maximum Sales Charge - Average Annual Total Returns

	1 Year	3 Years	5 Years	10 Years
A Shares	-18.28%	3.35%	1.05%	13.55%

Note: Class I and R6 Shares do not have sales charges.

Calendar Year Returns

Performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. For performance data current to the most recent month-end, visit our website at <https://us.rbcgam.com/mutual-funds> after the seventh business day after month-end or call 800.973.0073. Class A performance with maximum sales charge reflects a maximum 5.75% sales charge.

Performance shown reflects contractual fee waivers. Without such waivers, total returns would be reduced. Performance does not reflect the 2% fee on shares redeemed or exchanged within 30 days of purchase. If such redemption fee was included, performance would be reduced. Performance shown for a share class before its inception is based on the performance of the share class with the earliest inception date and adjusted to reflect the fees and expenses, and any applicable sales charges of the share class shown. Class I shares were designated Class S shares before 11.27.12.

¹The Adviser has contractually agreed to waive fees and/or pay operating expenses to limit the Fund's total expenses (excluding brokerage and other investment-related costs, interest, taxes, dues, fees and other charges of governments and their agencies, extraordinary expenses such as litigation and indemnification, other expenses not incurred in the ordinary course of the Fund's business and acquired fund fees and expenses) to the net expenses in the table. This expense limitation agreement is in place until 1.31.20 and may not be terminated by the Adviser before that date. Net expense ratios are as of the most recent prospectus/supplement dated 1.25.19 and applicable to investors.

Source: RBC, FactSet

Alpha - a risk-adjusted performance measurement of a portfolio's excess return relative to its benchmark after considering its risk relative to the benchmark.

Beta - a volatility measurement of a portfolio compared to a benchmark or the overall market and indicates the sensitivity of a portfolio's returns to benchmark or market movements.

R-Squared - a statistical measure of the strength of the relationship between a portfolio's returns and its benchmark's returns and therefore a measurement of what portion of a portfolio's performance can be explained by movements in its benchmark.

Sharpe Ratio - a risk-adjusted return measurement of efficiency and is calculated using a portfolio's standard deviation and excess return relative to a risk-free rate to determine reward per unit of risk.

Standard Deviation - a volatility measurement and represents the average, or standard, deviation of a return series from its mean, or average, return.

Upside Capture - a performance measurement of a portfolio compared to its benchmark when the benchmark had positive returns and is calculated by dividing a portfolio's returns by its benchmark returns and multiplying by 100.

Downside Capture - a performance measurement of a portfolio compared to its benchmark when the benchmark had negative returns and is calculated by dividing a portfolio's returns by its benchmark returns and multiplying by 100.

EPS Growth is not a measure of the Fund's future performance. Projected EPS growth rates provide the mutual fund investor details on the underlying stock holdings and their estimated growth in earnings per share. This does not imply an increase in earnings to the mutual fund investor, it only illustrates the expected increase in EPS growth rates of the underlying stocks that are owned within the mutual fund. It is the belief of the portfolio management team that there is a correlation between earnings growth rates and stock performance.

Long-Term Debt/Total Capitalization - a ratio used to show a company's financial leverage by comparing its long-term debt to its available capital.

Price/Book (P/B) - a ratio used to compare the market value of a company's stock to its book value.

Price/Cash Flow (P/CF) - a ratio used to compare a company's market value to its cash flow.

Price/Earnings (P/E) - a ratio for valuing a company that measures its current share price relative to its per-share earnings.

Price to Sales (P/S) - a ratio that measures the price of company's stock against its annual sales.

Return on Equity (ROE) - a measurement of a company's profitability and reveals how much profit a company generates with the money shareholders have invested.

Weighted Average Market Cap - an average market capitalization of a portfolio calculated by giving more value to stocks with greater portfolio weights than stocks with lesser portfolio weights.

The Russell 2000 Index measures the performance of the small capitalization segment of the U.S. equity market. It comprises approximately 2,000 small capitalization companies in the Russell 3000® Index. You cannot invest directly in an index.

Fund holdings and/or sector allocations are subject to change at any time and are not recommendations to buy or sell any security. Current and future holdings are subject to risk.

Mutual fund investing involves risk. Principal loss is possible. The Fund invests in small capitalization companies, which involve greater risks such as more volatility and less liquidity than larger companies. These risks are described more fully in the prospectus.

Diversification does not assure a profit or protect against loss in a declining market.

Before investing, you should consider carefully a fund's investment objectives, risks, charges, and expenses. This and other information is in the prospectus, which you can request by visiting <https://us.rbcgam.com/mutual-funds/literature/content/default.js> or calling 800.422.2766. Please read the prospectus carefully before investing.
